Eni i-Sint MS 5W-40

APPLICATIONS

Eni i-Sint MS 5W-40 is an innovative synthetic technology lubricant with 'mid SAPS' characteristics designed to meet the lubrication needs of the recent technology engines powered by petrol, diesel or gas/LPG that are fitted on cars or light duty commercial vehicles. The product contributes to reducing polluting exhaust emissions in accordance with the increasingly stringent environmental impact standards.

CUSTOMER ADVANTAGES

- Metal based additives present in engine oils, if used at certain concentrations, can compromise the operation and efficiency of exhaust emission reduction systems, resulting in increased emissions. Eni i-Sint MS 5W-40 contains low levels of these additives and thus ensures better efficiency and durability of these devices.
- Eni i-Sint MS 5W-40 resists deterioration, especially related to thermo-oxidative phenomena for long-term exposure to high temperatures in the presence of air and other agents.
- The viscosimetric features of its formulation facilitate cold starts and make it possible to save fuel which results in a reduction of CO2 emissions at the exhaust.
- Eni i-Sint MS 5W-40 has exceptional resistance to mechanical stress, which minimizes the viscosity reductions associated with its use.
- Eni i-Sint MS 5W-40 maintains its performance for the duration of its use, ensuring maximum engine protection and allowing the maximum oil change intervals prescribed by the manufacturers.
- Eni i-Sint MS 5W-40 lubricant is suitable for use in all cases in which a lubricant meeting the VW 505 00, 505 01 specifications is required without any prejudice for the durability of engines.

SPECIFICATIONS

- ACEA C3
- API SN PLUS
- MB 229.31
- BMW LL-04 (Approved)

Eni i-Sint MS 5W-40

- MB-Approval 229.51
- MB-Approval 229.52

CHARACTERISTICS

| Properties | Method | Unit | Typical |
|--------------------|-------------|----------|---------|
| Density at 15°C | ASTM D 4052 | kg/m³ | 854 |
| Viscosity at 100°C | ASTM D 445 | mm²/s | 13.5 |
| Viscosity Index | ASTM D 2270 | - | 177 |
| Viscosity at -30°C | ASTM D 5293 | mPa⋅s | 6145 |
| Flash point COC | ASTM D 92 | °C | 220 |
| Pour point | ASTM D 5950 | °C | -39 |
| B. N. | ASTM D 2896 | mg KOH/g | 7.0 |
